Senior BI & Sales Analytics Specialist with 15+ years at Jazeera Paints, the last 5+ years leading the commercial analytics function. I design and deploy Power BI dashboards, automate SQL-based reporting pipelines, and integrate SAP SD and CX data into actionable intelligence that supports executive decisions. My work has eliminated 60+ hours of manual effort per month, improved reporting speed by 40%, and delivered 15+ production dashboards used daily by management, regional teams, and C-suite stakeholders. Microsoft PL-300 certified with hands-on Python and data engineering skills.

WORK EXPERIENCE

Sales Analytics Section Head

2021 – Present

Jazeera Paints · Riyadh, Saudi Arabia · Paints / Manufacturing / FMCG

- Architected and deployed **15+ Power BI dashboards** covering sales performance, agent scorecards, regional heatmaps, pricing analysis, and executive KPI reporting — used daily by regional managers and C-suite.
- Engineered automated SQL Server + Power Query pipelines that eliminated **60+ hours of manual reporting work per month**, replacing ad-hoc Excel extracts with scheduled, validated data flows.
- Designed SAP SD and SAP CX integration flows connecting ERP transaction data directly to Power BI analytics — reducing data latency from days to hours.
- Defined and enforced **analytics governance standards**: KPI definitions, data quality rules, naming conventions, and a master data framework for the commercial division.
- Implemented **row-level security (RLS)** across dashboards, enabling self-service access for 20+ managers while maintaining data confidentiality per region.
- Mentored and trained **20+ users** across sales, operations, and finance on Power BI, DAX fundamentals, and data literacy best practices.

- Led cross-functional analytics projects in close partnership with commercial directors, regional managers, and the SAP team to translate business questions into analytical solutions.

Sales Analyst

2015 – 2020

Jazeera Paints · Riyadh, Saudi Arabia

- Built the foundational **sales reporting suite** used by the commercial team — replacing fragmented manual Excel files with structured, repeatable reports on revenue, targets, product mix, and agent performance.
- Developed **Python automation scripts** (Pandas) that reduced weekly data preparation from 8 hours to under 1 hour, freeing analyst capacity for higher-value work.
- Supported the **SAP CX implementation**: led data migration validation, cleansing, field mapping, and UAT — ensuring clean master data at go-live.
- Constructed **Excel Power Pivot models** for pricing and discount policy analysis, providing commercial managers with margin visibility and discount audit capability.
- Conducted systematic **data quality audits** across SAP SD transaction data, identifying and resolving master data gaps that affected reporting accuracy.
- Compiled and presented **actionable trend analysis** to management, covering sales productivity, seasonal patterns, and regional performance variance.

Project Coordinator

2010 – 2015

Jazeera Paints · Riyadh, Saudi Arabia

- Coordinated cross-functional project teams across sales, operations, and supply chain, ensuring deliverables, timelines, and stakeholder communications were managed effectively.
- Established **Excel-based reporting templates** and tracking systems for project milestones, budgets, and KPIs — the foundation of the later analytics function.
- Assisted with **ERP data collection and validation** for management review cycles, building early data-handling skills and cross-department relationships.

SELECTED PROJECTS

Sales Performance Command Center

↑ 40% Efficiency

Multi-layer Power BI dashboard suite built on SAP SD + SQL Server data. Covers YTD vs. target, regional heatmaps, agent scorecards, product mix, and discount analysis — with RLS for 15+ regional managers.

Power BI · DAX · SQL Server · SAP SD · RLS

SQL Reporting Automation & Data Quality Pipeline

60h/month Saved

T-SQL stored procedures and SQL Agent jobs replacing 60+ hours of monthly manual data processing. Includes automated quality checks with exception reporting before data reaches any downstream dashboard.

SQL Server | T-SQL | SQL Agent | ETL Automation

Agent & Showroom Performance Tracker

8h/week Saved

Power BI scorecard with dynamic rankings, performance tiers, and RLS — used by 15+ regional managers on Power BI Service for independent, self-service access to agent performance data.

Power BI | DAX | Row-Level Security | Power BI Service

Automated Market Price Intelligence Monitor

Competitive Intelligence

Python tool (BeautifulSoup + Pandas) scraping competitor pricing from market sources weekly, consolidating into structured Excel reports to inform pricing strategy and promotional timing decisions.
